

Quartet® Cubicle Solutions

Organize thoughts. Enhance your environment.

Quartet® Workstation Privacy Screens

The #1 complaint among people working in cubicles is a lack of personal privacy. Often, it takes up to 4 times longer than the interruption itself to return to your same level of concentration and productivity. The Quartet® Privacy Screen puts a barrier between unwanted distractions and serious work. This great solution transforms modular office spaces into distraction-free, interruption-free work areas. With the average knowledge worker being interrupted 73* times a day, the privacy screen allows you to get down to business, focus, and be more productive.
